COUNTRY LOGO (EXAMPLE)

Country logos must be created to match the scale and format of other country logos. This section provides guidance on how to create the logos.

Example country logo

ITF CHEMICAL

ITALFARMACO® GROUP

COUNTRY LOGO (EXAMPLE)

Country logos must be created to match the scale and format of other country logos. This section provides guidance on how to create the logos.

ITF CHEMICAL

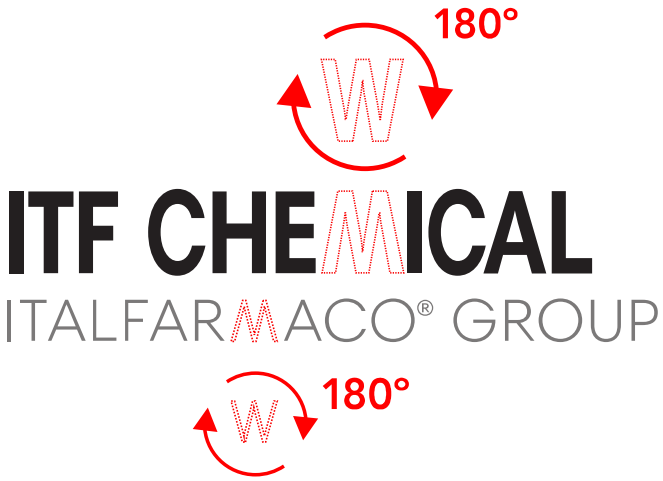
ITALFARMACO® GROUP

The ITALFARMACO® GROUP logo must be applied to all country logos.

The registration mark should be applied after the company name ITALFARMACO as this has been registered globally as a trade mark.

The corporate CRYSTAL must be positioned and scaled consistently for all country logos. Refer to the rules and examples within this section.

COUNTRY LOGO CONSTRUCTION



HARMONIA SANS BOLD (WITH KEYLINE)

HORIZONTAL SCALE 78%
(LETTERS C, G, O, Q 68%)
VERTICAL SCALE 98%
TRACKING -30
KERNING UNIQUE
'W' INVERTED

HARMONIA SANS LIGHT (WITH KEYLINE)

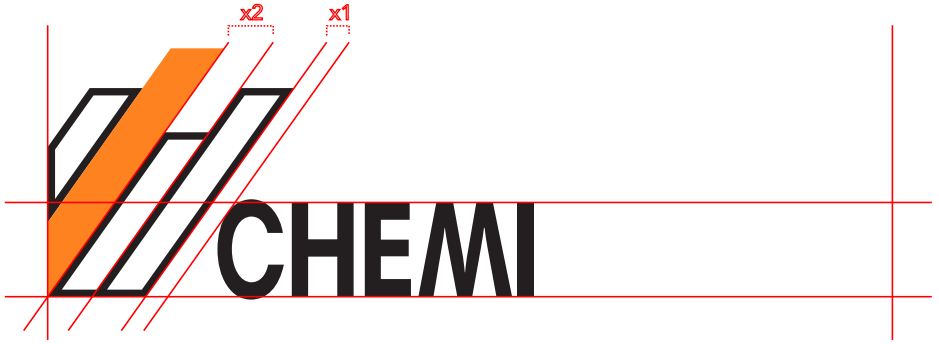
HORIZONTAL SCALE 80%
VERTICAL SCALE 80%
TRACKING 80
KERNING UNIQUE
'W' INVERTED

The ITALFARMACO typeface and fonts are available from Monotype® for local markets to create a consistent country specific logo but must follow this guide to ensure consistency with the global and country logos. If you require support creating a logo, please contact global corporate marketing.

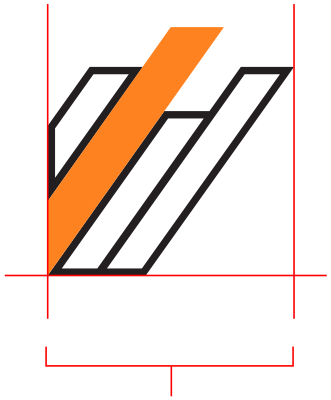
COUNTRY LOGO AND GROUP TAGLINE

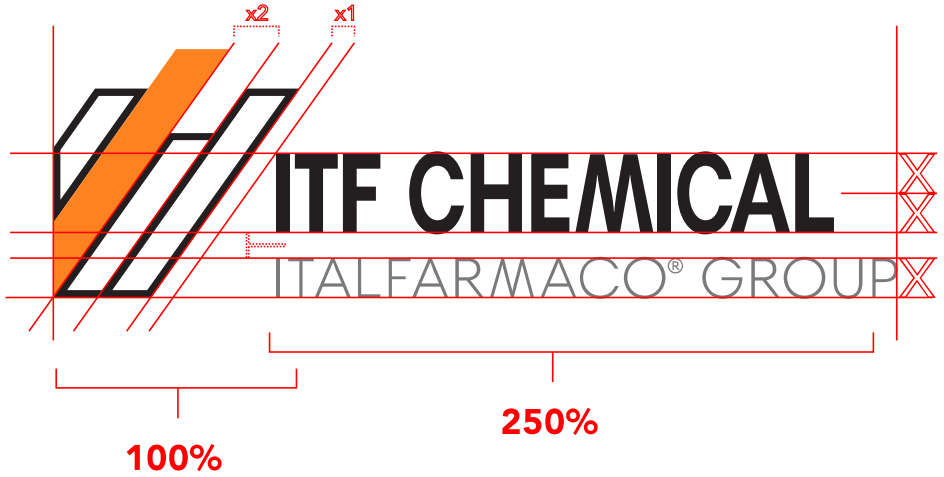
Spacing of the logo elements

It is important to ensure consistent spacing between the CRYSTAL, company name and tag line. Please adhere to the rules detailed in this diagram.



NO GROUP TAGLINE





The scale of the GROUP TAGLINE must be 250% width of the CRYSTAL

COMPANY IMAGE

TYPOGRAPHY & LETTERING

This section provides the typography information and guidance for digital and non-digital applications.

TYPEFACE

The global typeface is elegant, modern and communicates the company values.

Aa

Century Gothic Pro

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

123456789[$%#)(}?><^&@":|\!~

The global typeface has been selected for use on Mac and PC platforms and is available in Microsoft applications.

Century Gothic Pro is available for free and comes in four styles (Bold, Bold Italic, Regular and Regular Italic). For most purposes, these weights are adequate, but if you require more styles and weights, Century Gothic Paneuropean is available from Monotype® with 14 styles. Note that these will need to be purchased by your agency or licensed per user.

Regular Italic

BULLETS

The global typeface is elegant, modern and communicates the company values.

Aa

Century Gothic Pro

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua:

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua

Example bullet styles are shown here, together with line spacing and tracking. Generally, tracking is not required, but depending on the design, the Century Gothic Pro typeface can be tracked or kerned to suit the needs of the material.

A horizontal underline is also available to separate headlines from page content. Note that the diagonal ends on the bullet and bar match the CRYSTAL (54.615°).

DIGITAL USE

For digital applications, for example social or website use, Google typefaces are more suitable to ensure loading speeds.

Century Gothic Pro should be replaced by OUTFIT (Static) Google Font.

Aa

OUTFIT (Google Fonts)

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

123456789[$%#)(}?><^&@”:|\!~

Ensure Static is loaded and not the variable version of the font.

There are nine font weights available. Please note that Century Gothic Bold is replaced by Outfit Semibold.

COMPANY IMAGE

BRAND DESIGN COLOUR PALETTE

This section provides the colour palette, guidance and breakdown values for different channels.

PALETTE OVERVIEW

The fresh colour palette, introduced in 2024 provides an opportunity to revitalise the CHEMI brand, whilst sharing similar hues to those that exist, allowing markets to transition over time.

Primary and Accent Colours

All designs must utilise the primary palette to ensure materials have an orange bias, together with a lesser proportion of Rich Blue. Accent colours should only be used to supplement the primary palette, to show emphasis or meaning. The broad range of tones help designers specify individual HEX and RGB values, providing consistency across digital communication. Tints should be used rarely, except when required for print materials.

Text Colours

Rich Blue should be used whenever possible, but black can be use when contrast is paramount.

PRIMARY	ACCENT
CHEMI ORANGE	ITALFARMACO GREEN
RICH BLUE	NEUTRAL GREY 01
PALE BLUE	NEUTRAL GREY 02
SPEARMINT GREEN	BLACK

ORANGE PALETTE

The CHEMI ORANGE represents CONFIDENCE, ENTHUSIASM, and OPTIMISM.

The HEX to RGB conversion has been slightly adjusted to contain more blue (B = 32), so that when used in digital formats, the colour has more depth and contrast.

Colour Values and Gradients

As Adobe and Pantone are no longer fully integrated, the CMYK breakdown values are different depending on the end purpose. Therefore, different values are provided to ensure a printer can closely match the digital HEX colour in Adobe Photoshop or Illustrator, or to closely match the Pantone Spot colour, if spot colours are used.

Gradients can be blended smoothly between the palette colours in RGB or CMYK. See example below. Do not blend spot colours as they require over-printing.

CHEMI ORANGE

sRGB:

255, 130, 32 (Adjusted)

HEX #:

FF8200

IMPORTANT: HEX# vs RGB.

When using the HEX value for CHEMI orange (espacially on a website or App) please specify the RGB value first and then check the HEX matches FF8200.

The automated RGB value for # FF8200 may default to 255, 130, 0 if you type the HEX value first, but if you ensure the RGB value is 255, 130, 32, the HEX value will be correct as FF8200.

PRINT COLOUR (CMYK)

CMYK Adobe:

0, 61, 96, 0

0, 54, 100, 0

Closest match to 151 (CP) Spot Colour:

SPOT COLOUR

Pantone Solid Coated V5:

151

Closest match to Digital colour

GREEN PALETTE

The three colours within the green palette have been selected to communicate positive energy, representing GOOD HEALTH, INNOVATION, VIBRANCY, RIGOR and MODERNITY.

Dark greens in graphics and imagery should be avoided in favour of these fresh, rich midtones and light greens.

Colour Values and Gradients

As Adobe and Pantone are no longer fully integrated, the CMYK breakdown values are different depending on the end purpose. Therefore, different values are provided to ensure a printer can closely match the digital HEX colour in Adobe Photoshop or Illustrator, or to closely match the Pantone Spot colour, if spot colours are used.

Gradients can be blended smoothly between the palette colours in RGB or CMYK. See example below. Do not blend spot colours as they require over-printing.

ITALFARMACO GREEN

BLUE PALETTE

The three colours within the blue palette have been selected to communicate positive strength, representing QUALITY, TRUST, RELIABILITY, HERITAGE and SERENITY

Rich blue should be used for text where possible, but black is also fine depending on the design.

Colour Values and Gradients

As Adobe and Pantone are no longer fully integrated, the CMYK breakdown values are different depending on the end purpose. Therefore, different values are provided to ensure a printer can closely match the digital HEX colour in Adobe Photoshop or Illustrator, or to closely match the Pantone Spot colour, if spot colours are used.

Gradients can be blended smoothly between the palette colours in RGB or CMYK. See example below. Do not blend spot colours as they require over-printing.

MONOTONE PALETTE

The three colours within the monotone palette have been selected to communicate authority, representing ELEGANCE, PRESTIGE, GRACE, REASSURANCE and ADVANCEMENT.

Neutral Grey 02 should be used conservatively.

Colour Values and Gradients

As Adobe and Pantone are no longer fully integrated, the CMYK breakdown values are different depending on the end purpose. Therefore, different values are provided to ensure a printer can closely match the digital HEX colour in Adobe Photoshop or Illustrator, or to closely match the Pantone Spot colour, if spot colours are used.

Gradients can be blended smoothly between the palette colours in RGB or CMYK. See example below. Do not blend spot colours as they require over-printing.

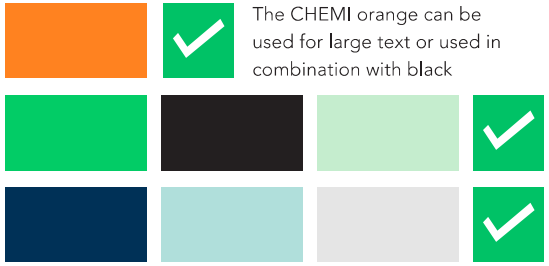
LEGIBILITY SAFE COLOURS

Colours have been selected with accessibility and legibility in mind. RICH BLUE can be used on all pale colours except the CHEMI orange. CHEMI orange should be combined with black when used for small text and body copy. See the contrast checker results for examples.



The CHEMI orange can be used for large text or used in combination with black

Mid-tone colours NOT selected for small text

Mid-tone colours should not be used for body copy text, but can be used for graphics and illustrations and sometimes large headlines where contrast is not paramount.

Note that CHEMI orange should not be used for text on a pale background, as it fails the websafe text at all sizes.

Credit: WebAIM © WebAIM webaim.org

COMBINING COLOURS

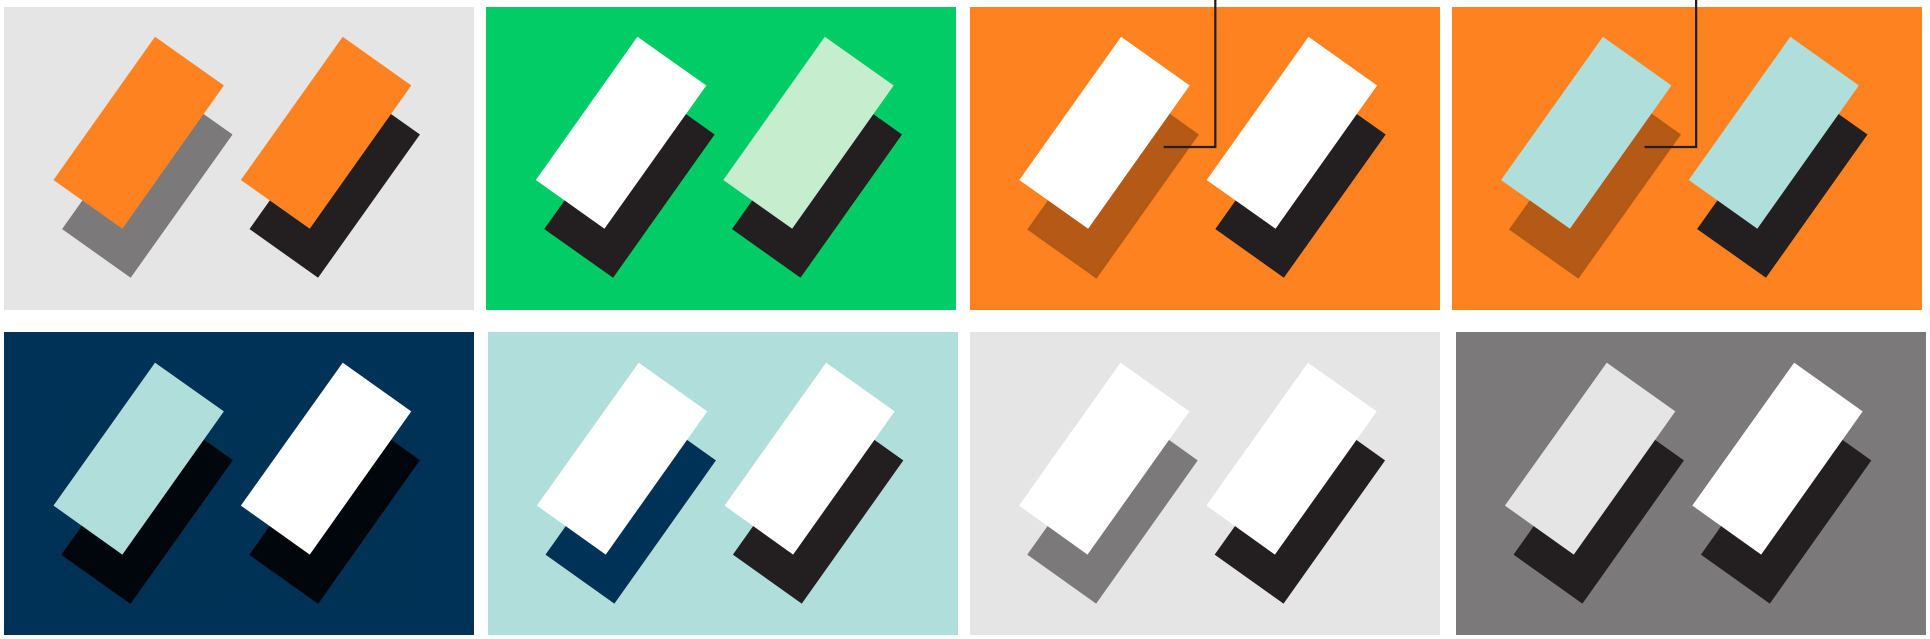
When designing materials, designers must ensure that orange, or orange and white is most prominent. The materials should feel fresh and vibrant, with accents of blue, grey and black where useful to elevate the design.

Imagery and graphics will add further warmth and colour, without the design layouts looking to dark or heavy.

If large areas of colour are used, add extra space to break up content to allow it to breath where possible.

Avoid using too many gradients, unless they add subtle depth to the overall design.

SHADOWS (AND COMBINING COLOURS)

When creating shadows, select a darker colour of the same hue, for example light or pale blue with dark blue, rather than mixing colours). Black can be used with all colours.


Note: In some cases a black tint with a multiply effect may need to be used to create dark shadows.
